- Comprehensive intranet software. All the intranet features you need for useful internal collaboration.
- Visually attractive. Easy to setup. Easy to manage. Easy to Use.
- Perfect for mid-sized organizations. Straightforward licensing, important features and low cost.
- No vendor lock-in. Source code is available on your server.
- Platform with solid architecture. Useful for building internal business apps.

Precurio is an intranet portal solution for mid-sized organizations that are not ready to make large investments in robust intranet solutions that may never get used.

Amongst other benefits, our “back to the basics” approach to internal collaboration is what sets us apart from other enterprise grade intranet solutions.

According to customers, our most unique feature is our powerful document sharing features and simple workflow automation.

Precurio is currently used by customers in 22 countries and is available in 5 different languages.

built and supported on...
